

Micro Solar Power Projects, 10 major cities of Assam

Name of Project	Micro Solar Power Projects, 10 major cities of Assam
Project Location	Across the 10 major cities of Assam
Approx. Project cost	INR 30 crores (~USD 4.62 Million)
Focus sector	Renewable Energy (Solar)
Status of approvals	Project preparation activities underway
Project contours	<p>Assam has around 3.4 to 4.6 kWh of solar power potential/sq.m/day and with the estimated number of clear days in the range of 240 to 260, which translate into a solar potential of around 13.76 GW2 to 13.76 GWh.</p> <p>Rooftop solar projects of 2.5 MW on existing public buildings in ten major cities of Assam</p> <p>The roof top space of government buildings, Hospitals, Railways Stations, Airport can be utilized for generating substantial rooftop solar energy.</p>
Investment Opportunities	Investment opportunity through PPP Model
Proposed infrastructures	Setting up of solar power units on pre-identified rooftops having more than 200 square feet built area
Nodal agency	Assam Power Distribution Company Ltd.
