

Water Supply Project, Dhubri

Name of Project	Water Supply Project, Dhubri
Project Location	Dhubri
Approx. Project cost	INR 81 crores (~USD 12.46 million)
Focus sector	Urban Water Supply
Status of approvals	Pre-feasibility for the project on PPP mode has already been done.
Project contours	<p>The estimated demand for water supply to all consumers is expected to be 13 MLD and 18 MLD by 2025 and 2035 respectively.</p> <p>Currently less than 20% of households are connected with the water supply network. Further the planned industrial development in the region will add further pressure to the existing water supply network.</p> <p>To meet the existing demand and future demand, the proposed project on PPP mode has been conceived to ensure 24x7 water supply to all the consumers.</p> <p>The proposed project involves creating and augmenting the water supply network across the water supply value chain.</p>
Investment Opportunities	Development and maintenance of water supply network on PPP mode.
Nodal agency	Urban Development Department, Government of Assam.
