

Water Supply Project, Dibrugarh

Name of Project	Water Supply Project, Dibrugarh
Project Location	Dibrugarh
Approx. Project cost	INR 162 crores (~USD 24.92 million)
Focus sector	Urban Water Supply
Status of approvals	Pre-feasibility study for the project on PPP mode has already done.
Project contours	<p>The estimated demand for water supply to all consumers is expected to be 27 MLD and 36 MLD by 2025 and 2035 respectively.</p> <p>Currently less than 30% of households are connected with the water supply network. Further the planned industrial development in the region will add further pressure to the existing water supply network.</p> <p>To meet the existing and future demand, the proposed project on PPP mode has been conceived to ensure 24x7 water supply to all the consumers.</p> <p>The proposed project involves creating and augmenting the water supply network across the water supply value chain.</p>
Investment Opportunities	Development and maintenance of water supply project on PPP mode.
Nodal agency	Urban Development Department, Government of Assam
